Guanhe Huang

guanhe.huang@kcl.ac.uk · +44 7519 265331 · KCL Profile · Google Scholar · GitHub

Human Motion · Affective Computing · Human–Robot Interaction

Education

2023–2027 **King's College London**, London, UK — *PhD in Engineering Research, expected Sep 2027*
Deep Generative Human Motion Modeling for Human–Robot Interaction — Supervisor: **Dr Oya Celiktutan**

2020–2023 **Nanchang University**, Nanchang, China — *Master in Control Science and Engineering*

2015–2019 **Beijing Information Science and Technology University**, Beijing, China — *BS in Automatic Control*

Research

2026 **Improving the Diffusability of Motion Tokenizer**
Guanhe Huang, Tangzheng Lian, Oya Celiktutan
NeurIPS 2026 Spotlight · Top 1.3% (292/30,709) [Paper]
Contribution: Post-training motion tokenizers with spectral latent regularization and generative decoding for diffusion-friendly latent spaces.

2026 **Unified Number-Free Text-to-Motion Generation via Flow Matching**
Guanhe Huang, Oya Celiktutan
CVPR 2026 Highlight · Top 3.6% (578/16,092) [Paper] [Project] [Code]
Contribution: Unified flow matching for variable-person motion generation, reducing computation and stage-wise error accumulation.

2026 **FILD: Flash Interaction Latent Diffusion for Real-Time Text-Conditioned Human-Human Interaction Generation**
Guanhe Huang, Ruiqi Zhu, Oya Celiktutan
IEEE FG 2026 [Paper]
Contribution: One-step real-time human–human interaction generation via consistency and distribution-matching distillation.

2026 **Efficient Continual Imitation Learning With Online Meta-Adapters**
Ruiqi Zhu, Endong Sun, **Guanhe Huang**, Oya Celiktutan
IEEE Robotics and Automation Letters [Paper] [Project]

2024 **Gaze Estimation by Attention-Induced Hierarchical Variational Auto-Encoder**
Guanhe Huang, Jingyue Shi, Jun Xu, Jing Li, Shengyong Chen, Yingjun Du, Xiantong Zhen, Honghai Liu
IEEE Transactions on Cybernetics [Paper] [Code]

2024 **Rethinking Inconsistent Context and Imbalanced Regression in Depression Severity Prediction**
Guanhe Huang, Jing Li, Heli Lu, Ming Guo, Shengyong Chen
IEEE Transactions on Affective Computing [Paper]

Research and Industry Experience

2026.06–2026.12 **Tencent, Interactive Entertainment Group, London, UK** — *Generative AI Research Intern*
Building monocular 3D human-motion reconstruction for stylized content (anime, manga, and game footage), together with an LLM-based QA/repair agent for temporal and kinematic failures.

2019.10–2020.06 **Institute of Computing Technology, Chinese Academy of Sciences** — *Research Intern*
Worked on NLP and knowledge graphs, including entity/relation modeling and structured semantic representation.

Technical Skills

ML: Python, C++, PyTorch, TensorFlow, Transformers, Diffusion Models, Flow Matching.
3D / Robotics: Human Motion, Motion Capture, Maya, Blender, Unity, ROS2, Isaac Gym.
Systems: Linux, Git, Docker, Slurm, Weights & Biases.
